About Me

Dedicated MERN Stack developer with 2 years of hands-on experience in designing and implementing robust web applications. Proficient in building scalable and efficient back-end systems using Node.js and Express, alongside crafting dynamic front-end interfaces with React. Adept at working collaboratively in Agile environments, consistently meeting project deadlines, and delivering high-quality code. Strong problem-solving skills and a passion for staying up-to-date with emerging web development technologies. Seeking opportunities to leverage expertise in creating innovative and user-centric web solutions.

Professional Experience

PartyWitty | Full-Time as Full Stack Developer

Aug, 2023 – Present

Key responsibilities:
- Working as a team player and providing end-to-end solutions.
- I am responsible for Developing an artist module for a party-witty application using the MERN (**MongoDB**, **Express**.js, **React**.js, **Node**.js) stack, enabling seamless artist profile creation, management, and booking. Integrated real-time communication features to facilitate artist-client interactions. Implemented a robust search and recommendation system for artists based on user preferences. Ensured secure payment processing and handled event scheduling, enhancing user experience and event planning efficiency. Employed agile development methodologies to deliver a dynamic and user-centric module.

La Majeste Group | Full-Time as Full Stack Developer

Feb, 2022 – Aug 2023

Key responsibilities:
- Worked with a team of 4 web developers and provided end-to-end solutions for 20 clients.
- Collaborated with teammates and updated application versions using **Git** and **Github**.
- Used best practices in React to develop static and dynamic sites.
- Performed daily operations and maintenance tasks to ensure web pages, up-to-date and free of errors.
- Optimized UI load times and performance by up to 90% by fixing bugs.
- Communicate with back-end developers for any front-end problematic issues, improved accuracy rating to 98%.
- Built and maintained websites for clients through various online platforms.
- Manage work by balancing demands with available capacity.

Education Background

- **Bachelors in Computer Science Engineering**
  Chandigarh University
  Session: 2018-2022 |

- **Senior Higher Secondary School**
  Shree Ekarshanand Aadarsh Inter College
  Session: 2015-2017 |

- **Higher Secondary School**
  Gautam Buddh Inter College, Mainpuri
  Session: 2013-2015 |

Certifications

- Full-Stack Web Development with React Specialization from Coursera.
- Data Structures and Algorithms Specialization from Coursera.

Cysqye Softwares | Intern as Software Engineer

Sept, 2021 – Feb, 2022

Key responsibilities:

- Completed 100 hours of training on web development with React on Coursera.
- Regularly perform maintenance on the front end of the platform, which is based on HTML, CSS, **Tailwind CSS**, and **React**.
- Communicate with back-end developers for any front-end problematic issues, and improved accuracy.
- Optimized UI load times and performance by up to 80% by fixing bugs.
- Build and maintain core web services and websites.
- Write well-designed and efficient code by using the best software development practices
- Collaborate with senior developers to update the website and create new features.

Projects

PartyWitty Artist Module

Key responsibilities:

- Worked as an Individual developer and provided end-to-end solutions.
- I developed an artist module for a party-witty application utilizing the MERN (MongoDB, Express.js, React.js, Node.js) stack. This included enabling smooth artist profile creation, management, and booking, alongside integrating real-time communication features to enhance artist-client interactions. I also implemented a robust search and recommendation system based on user preferences, ensuring secure payment processing and efficient event scheduling. Throughout, I followed agile development methodologies to deliver a dynamic, user-centric module.

Erhem AI , Erhem Group & Erhem Mobile

Key responsibilities:

- Worked with a team of 4 web developers and provided end-to-end solutions.
- Developed a feature-rich Hybrid E-commerce, Business, Dynamic, and Static websites and Mobile applications Using Reat Native leveraging React and Redux for dynamic user interfaces and seamless state management.
- Integrated a robust Node.js backend to handle data processing, user authentication, and API interactions for enhanced functionality.
- Utilized MongoDB to establish a scalable database solution, ensuring efficient storage and retrieval of product and user information.
- Achieved optimal performance and user experience by implementing responsive design principles and efficient data handling throughout the platform

EasySalon

Key responsibilities:

- Worked as a Full Stack Developer in the EasySalon application, I played a pivotal role in the development of a cutting-edge web application that revolutionized the salon management industry. Leveraging my expertise in front-end technologies like React and back-end proficiency in Node.js and MongoDB, I engineered a responsive and user-friendly platform. I contributed to seamless appointment scheduling, **payment** processing, and **inventory management**, enhancing operational efficiency for salons and spas. My dedication to optimizing performance and ensuring scalability resulted in a high-performing application. Through collaboration with cross-functional teams, I delivered innovative solutions that enriched the user experience of both salon owners and clients.
